

Guide to Choosing the Right Water Heater

Types of Water Heaters:

1. **Tank Water Heaters:** Traditional and affordable; available in various sizes.
2. **Tankless Water Heaters:** Energy-efficient, providing hot water on demand.
3. **Solar Water Heaters:** Eco-friendly, using solar panels to heat water.
4. **Heat Pump Water Heaters:** Ideal for warm climates, reducing energy costs.

Factors to Consider:

- **Capacity:** Based on household size and water usage.
- **Efficiency:** Look for Energy Star-rated models.
- **Cost:** Consider upfront and long-term operating costs.
- **Installation Space:** Ensure compatibility with your home's setup.

Maintenance Tips:

- Flush the tank yearly to prevent sediment buildup.
- Inspect the anode rod every 3 years.
