

Preventing and Fixing Common Sewer Issues

Common Sewer Problems:

1. Tree root intrusion.
2. Sewer line blockages from grease or debris.
3. Cracked or collapsed sewer lines.

Prevention Tips:

- Avoid planting trees near sewer lines.
- Dispose of grease and non-flushable items properly.
- Schedule regular sewer inspections and cleanings.

Fixing Sewer Issues:

- Use a plumbing snake or hydro jetting for clogs.
- Repair cracks with trenchless pipe repair methods.
- Replace old sewer lines if damage is extensive.

Signs of Sewer Trouble:

- Persistent odors near drains.
- Gurgling noises in pipes.
- Frequent backups or slow drains.
