

### ### Seasonal Plumbing Maintenance Tips

#### #### Spring Tips:

- Inspect pipes for winter damage.
- Clean gutters and downspouts.
- Test outdoor faucets for leaks.

#### #### Summer Tips:

- Check for low water pressure caused by increased demand.
- Inspect your sprinkler system.
- Ensure your sump pump is operational.

#### #### Fall Tips:

- Insulate exposed pipes before freezing temperatures arrive.
- Flush your water heater to remove sediment.
- Check your water pressure regulator.

#### #### Winter Tips:

- Keep cabinet doors open to warm pipes.
- Let faucets drip to prevent freezing.
- Disconnect outdoor hoses to avoid frozen spigots.
